1:45 - 2:15 PM   **SEQUOIA A**

See the latest mapping apps and find the answers to the GIS questions that have been bugging you for months.

In 2012, TCiCT leadership recognized the need to enhance awareness of the vast amounts of technology available. They envisioned an event that would let both County users and members of the public see firsthand the hardware and software that makes the County run. From this germ of an idea, CVTEC (Central Valley Technology Expo and Conference) grew from a small exhibition in a single upstairs room at Government Plaza to an all-day event at the Visalia Convention Center.

Now in its seventh year, CVTEC provides County employees with the opportunities to visit technology vendors, receive training and participate in fun activities that make technology more accessible. Gone are the days when only a select few used computing devices. With the ubiquity of smartphones and other devices, our lives now rely heavily on technology. CVTEC gives TCiCT the chance to show you some of the different technologies available.

At CVTEC 2018, attendees can learn how to keep themselves and their families safe from digital attacks, how advances in mapping have changed agriculture, how technology drives the future of law enforcement and public safety, and even how to manage an unruly smartphone! Vendors like Verizon, Esri, NWN and others will be there alongside representatives from Sheriff and Fire to show off their latest gadgets. Plus, Security Jeopardy, drones, mind-blowing reporting technology, and a dynamic keynote address by County DA Tim Ward. Don't miss out!

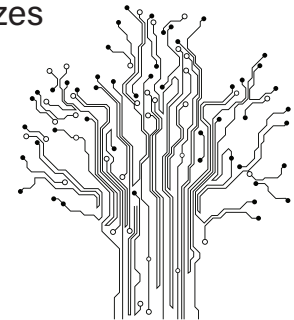

February 21, 2018
